

# Black Hole Black Bomb instructions

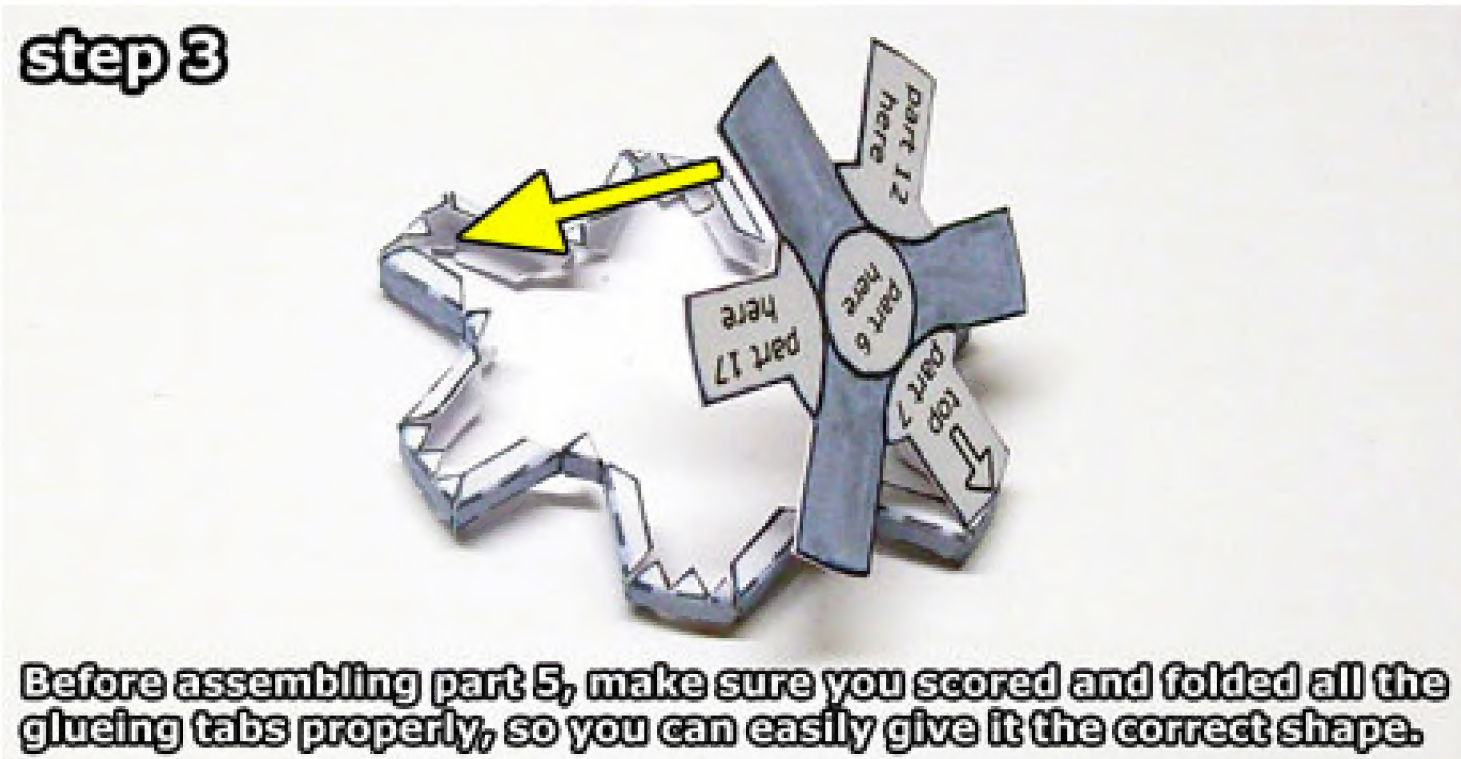

## step 1

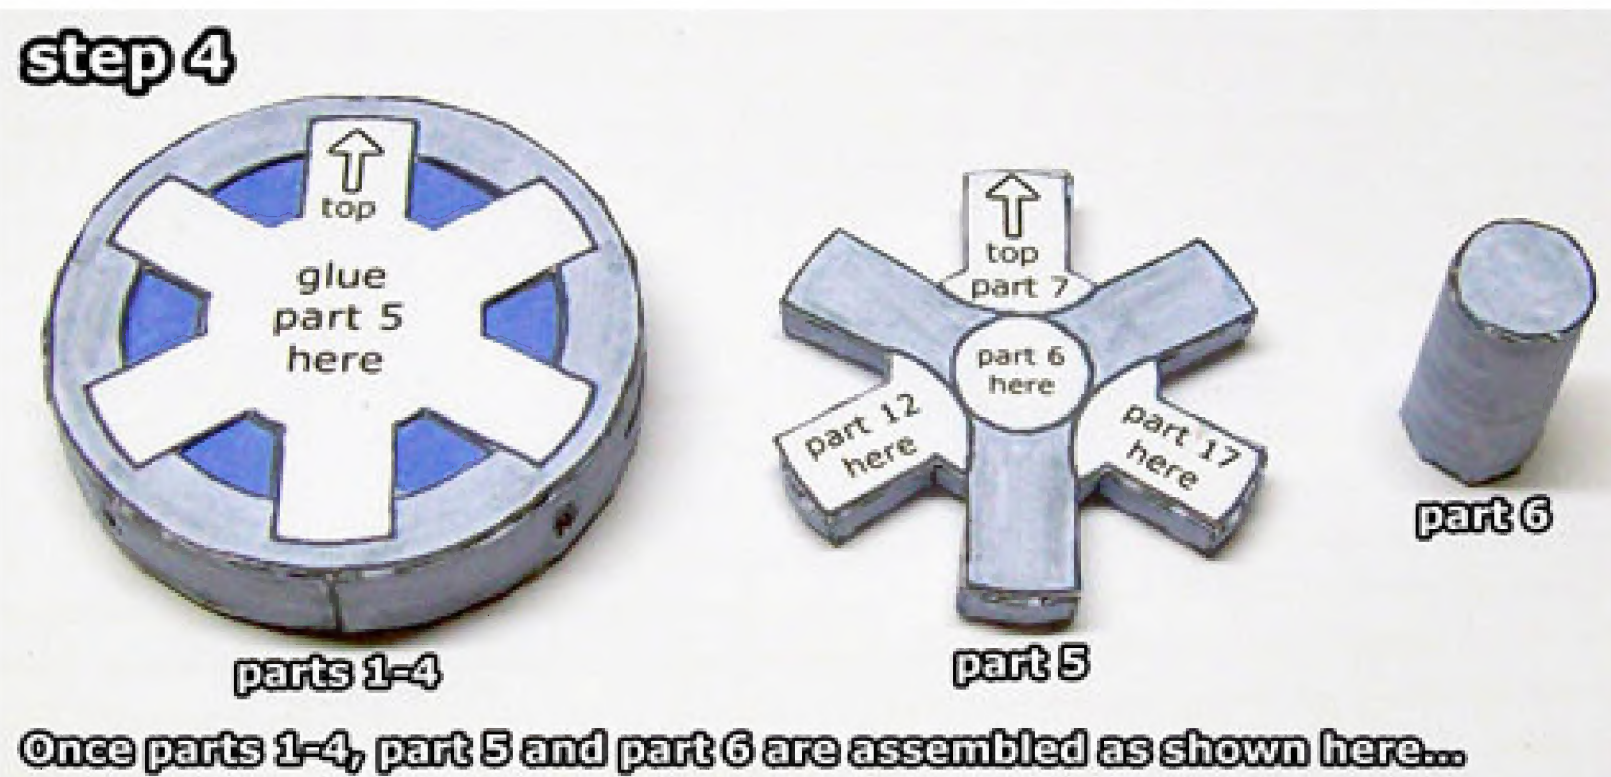

## step 2

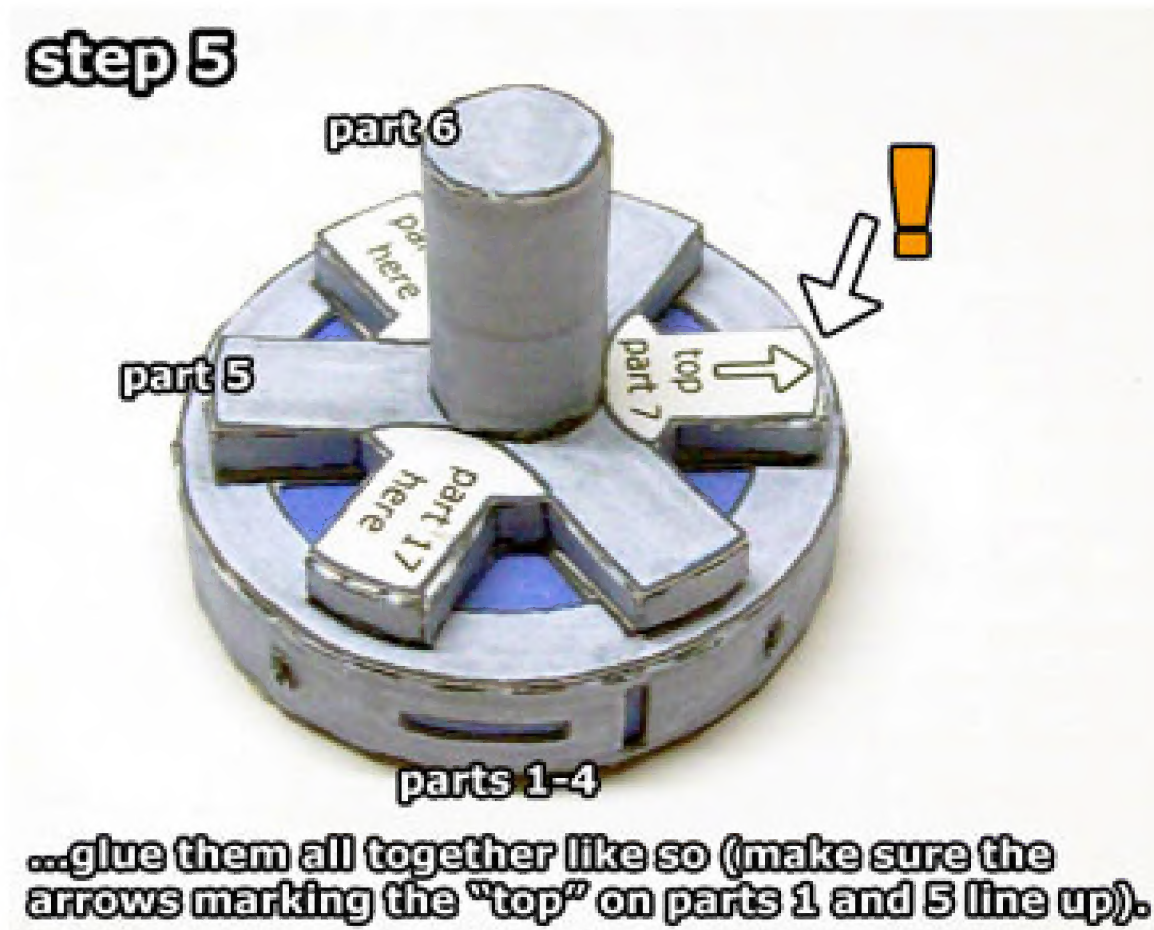

## step 3

## step 4

## step 5

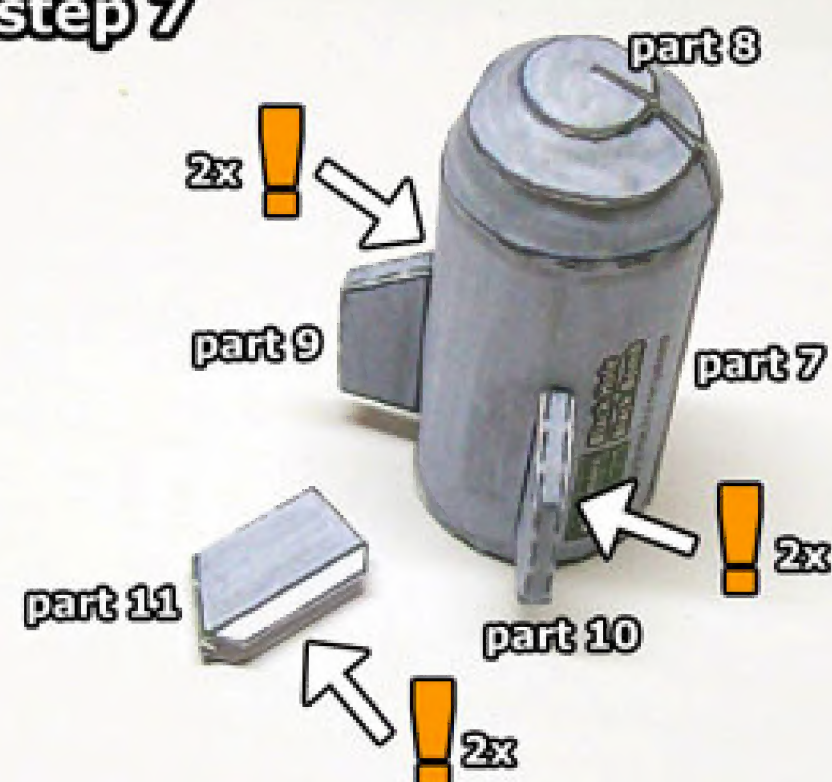

## step 6

Take your time pre-shaping and glueing together part 7 ((don't forget to cut the 6 slits on the sides!)) and part 8...

## step 7

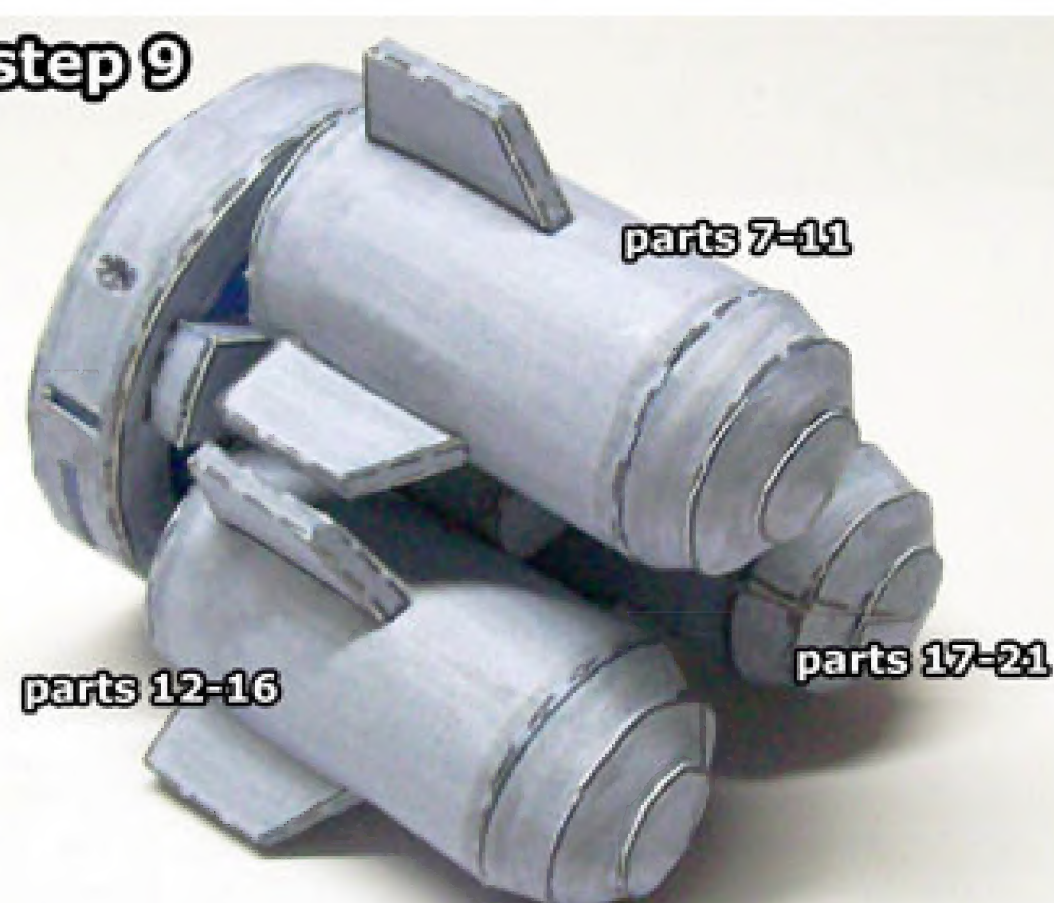

...then glue them together, and cut out and assemble parts 9-11 and glue them on as well, by pushing the glueing tabs through the slits on part 7.

## step 8

Now glue the first bomb to the platform as shown here.

## step 9

Do the same for the other bombs (parts 12-16 and parts 17-21). Adjust the fins a bit if necessary.

## step 10

Glue together parts 22-24 as shown here (part 24 with the coloured side in!) and do the same for parts 25-27.

## step 11

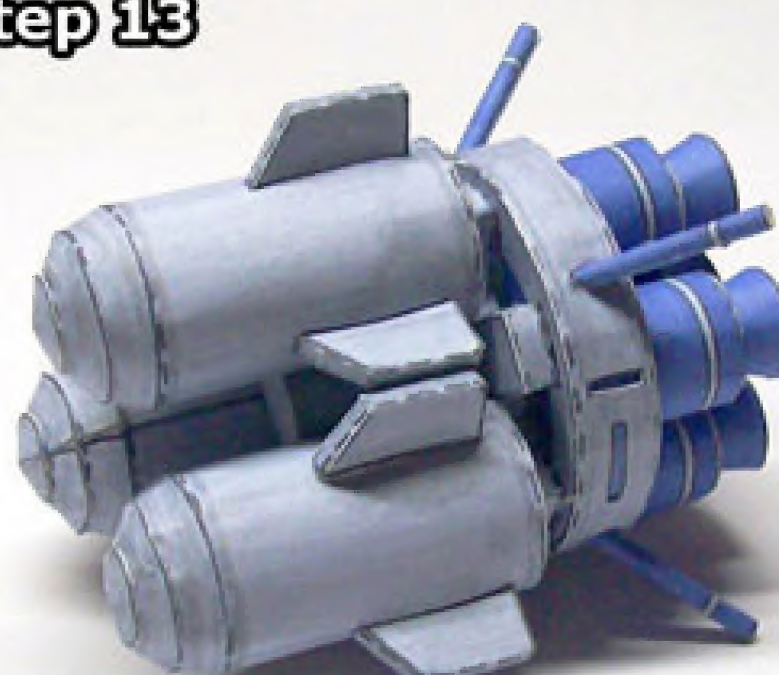

Now glue on the assembled parts 22-27 as indicated on the bottom of part 1.

## step 12

Roll up parts 40-43 as tight as possible as shown here...

## step 13

...and then glue them into the small, oval holes with glueing tabs on the sides as part 1 as shown here.

**Black Hole  
Black Bomb**

Thank you for building a Ninjatoes' papercraft modell!
